**Agenda Item 6: Review States' activities and interregional issues on trials and implementation of ADS-B**

**AUSTRALIAN FAQ**

(Presented by Australia)

**SUMMARY**

Airservices Australia, AOPA and the Aircraft Electronics Association have produced a Frequently Asked Questions (FAQ) related to ADS-B related to General Aviation.

**1. Introduction**

1.1 In Australia the key stakeholders in Air Traffic Management planning meet regularly in an organisation called ASTRA (see [www.astra.aero](http://www.astra.aero)). The Surveillance Technology Working Group (STWG) prepares advice for ASTRA on issues related to ADS-B and other surveillance technologies.

1.2 The STWG members recently prepared a Frequently Asked Questions (FAQ) document related to ADS-B for the Australian General Aviation community. Close co-ordination between ANSP, AOPA, and Aircraft Electronics Association has enabled the one document to be available through the website of multiple organisations as follows:
