

Case study 3 Continued Oversight programme

Jorge Reyes

Aerodrome Certification

Bangkok, Thailand, 20 to 24 of January 2020

Case study 3: Continuing oversight program

Working in groups of 4-5 people, discuss the following topics:

1. Does your current continuing oversight program comply with EASA requirements?
2. If not, which changes could be done to comply with EASA requirements?

Case study 3: Continuing oversight program

→ The CAA of the country LALALAND is planning the certification processes and the following ongoing oversight cycle. In the country there are 5 public airports. Of those 5 airports, only 1 exceeds 10 million passengers.

1. Define the planning for the certification processes, taking into account that the Andals legislation establishes a December 2021 deadline to finish all the certifications.
2. Determine if you are going to carry out the same typologies and number of oversight inspections for all airports.
3. Define the different typologies.
4. Based on the previous typologies, plan an oversight cycle for each airport and fill in at least two complete cycles.

Airport	2019	2020	2021	2022	2023	2024	2025	2026
Airport 1 (+10 mill)								
Airport 2								
Airport 3								
Airport 4								
Airport 5
