- Vaccination against COVID-19 has now started in **206** locations

(Source: Our World in Data.Last Updated 20 May, 2021)

Location	Doses given	Fully vaccinated (% of population)	At least 1 dose (% of population)
Worldwide	1.59B ^a	376,173,766 ^b (4.8%)	739,208,299 ^c (9.5%)

a: This data changes rapidly and might not reflect doses still being reported. It may differ from other sites & sources.

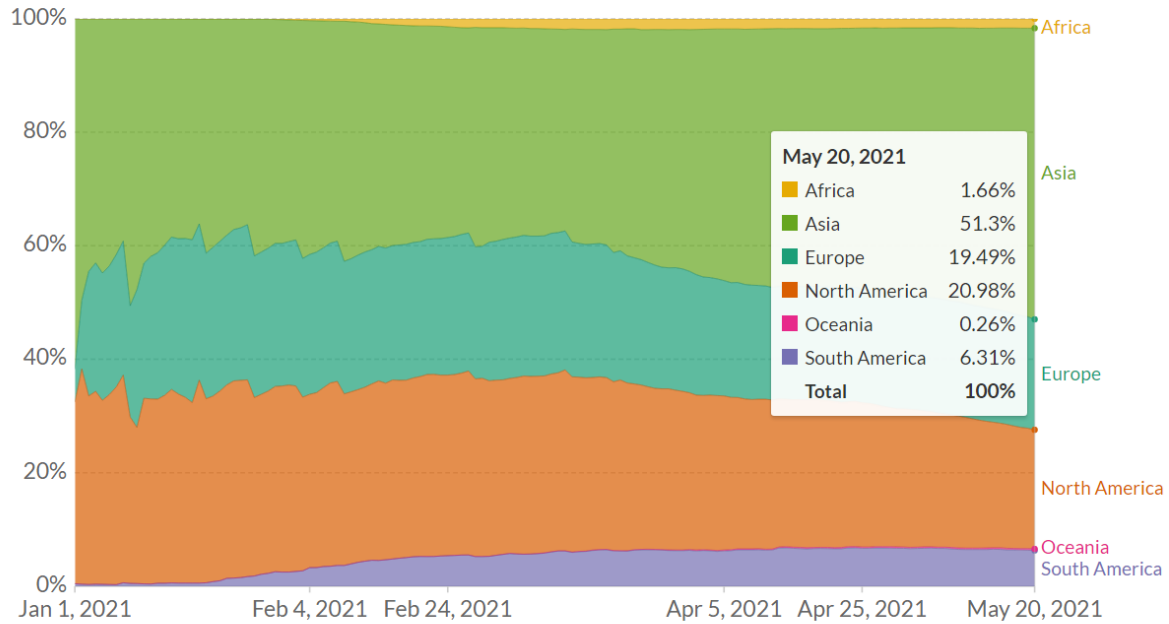

b: Where data for full vaccinations is available, it shows how many people have received at least 1 dose and how many people have been fully vaccinated (which may require more than 1 dose).Where data for full vaccinations isn't available, the data shows the total number of vaccine doses given to people. Since some vaccines require more than 1 dose, the number of fully vaccinated people is likely lower.

c: It only has full vaccination totals in some locations.

COVID-19 vaccine doses administered by continent

Total number of vaccination doses administered. This is counted as a single dose, and may not equal the total number of people vaccinated, depending on the specific dose regime (e.g. people receive multiple doses).

Relative
