

An aerial photograph of a drone flying over a vast, green agricultural landscape. The drone is positioned in the center of the frame, flying towards the viewer. The landscape below is a patchwork of green fields, some of which are divided into smaller sections by narrow paths or ditches. The sky is a clear, light blue, and the overall scene is bathed in a soft, natural light. The text 'SDG' is overlaid in the upper center of the image.

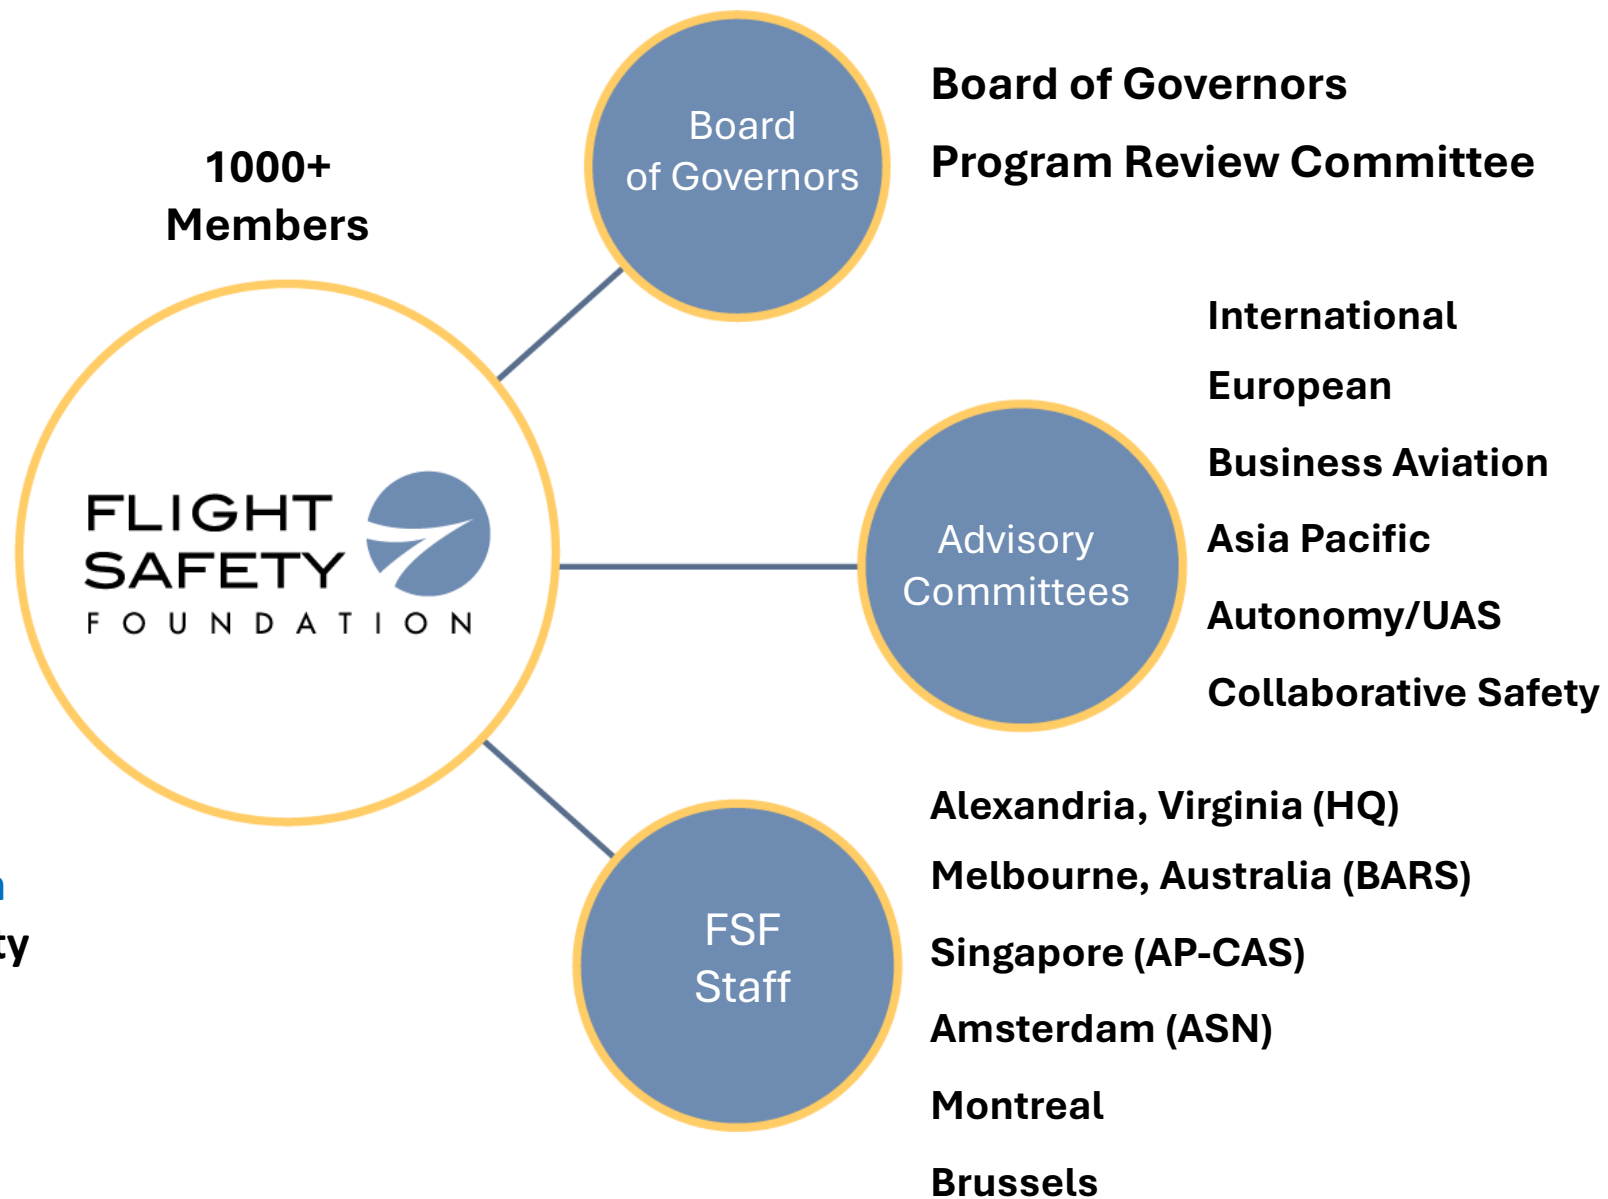

SDG

AAM

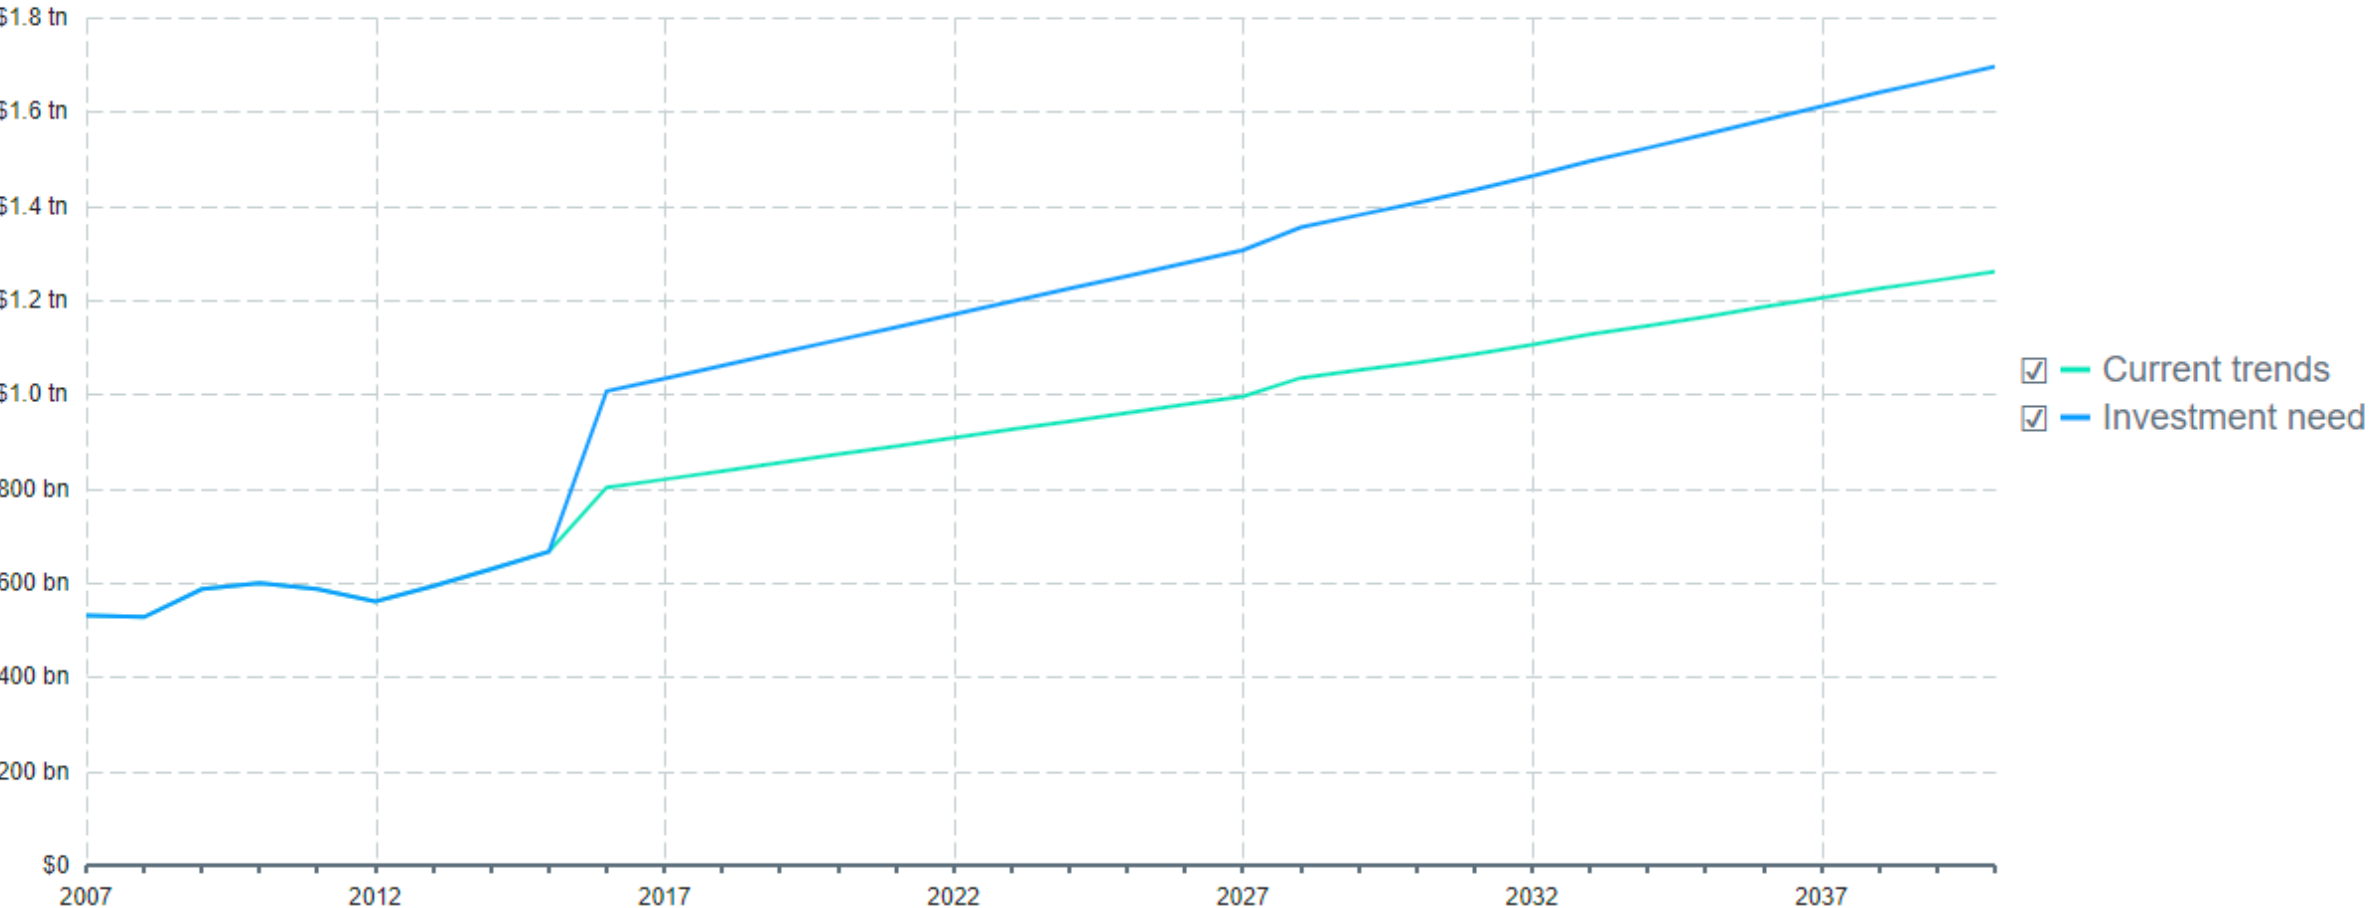

Flight Safety Foundation is an independent, impartial and international **not-for-profit** organization

**Founded in 1945** by aviation pioneers that included Jerry Lederer, Gloria Heath, Richard Crane and David Morrison

FSF applies **safety analysis, safety information** and expertise to advance global aviation safety

# Infrastructure investment at current trends and need

# Key safety themes for AAM

## We believe AAM will...

- increase access to flight by bringing down **operational costs**.
- enable **more efficient ground travel** by taking goods and passengers into the sky.
- improve the **return on infrastructure investment** by evolving the design and use of shared resources.
- refine existing data-driven technologies to enable **in-time predictive risk modeling**.

Thank you!

Harrison Wolf
