

# ICAO Drone Enable 2023 symposium

UTM from an industry perspective

Montreal, 05/12/2023

# DRONIQ FOR FLIGHT

DRONIQ 

# Who we are?

Droniq combines know-how for safe & efficient UAV operation

## Joint development

2016-2018

Cooperation between **DFS Deutsche Flugsicherung** and **Deutsche Telekom** within the joint research project "**Connected Drones**"

## Expertise combined

2019

Start of the **joint venture Droniq** (51% DFS, 49% Telekom) with first **UAS Traffic Management Services**

## Shaping the future

Droniq is based in Frankfurt am Main and is grown to 22 employees until now

# Our challenge - drones are invisible

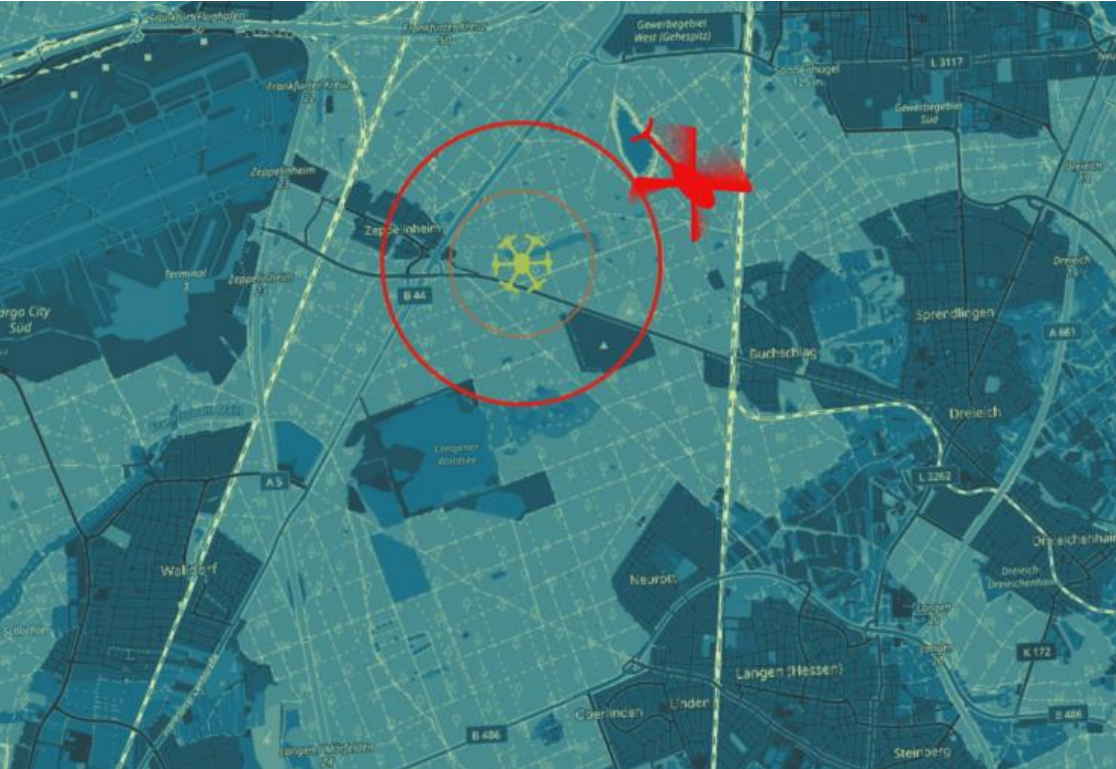

## Restricted drone potential

Drones are not easy to locate for manned aviation, air traffic control but also for other operators

**LIMITED POTENTIAL  
FOR PROFESSIONAL  
DRONE USE**

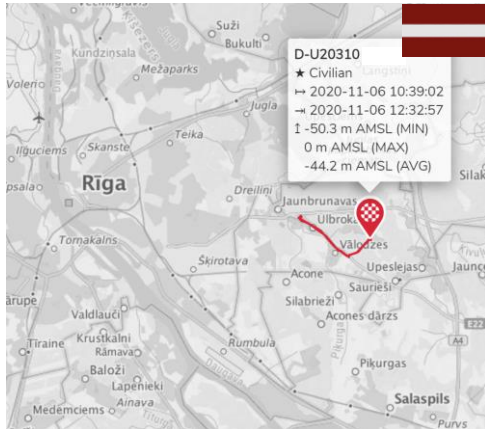

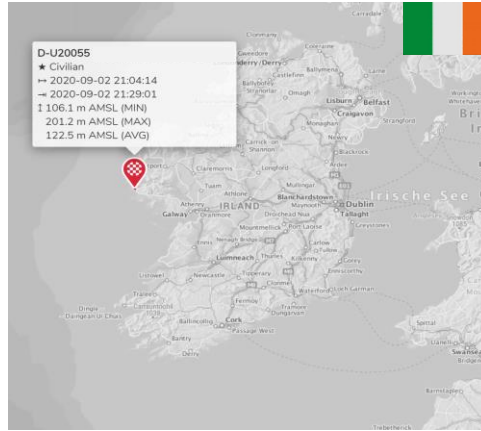

# Our mission – fair and safe integration of UAS

Products and services along the entire process from a single source - Droniq supports you in any phase of the drone flight

**AUTHORISATIONS  
ELECTRONIC VISIBILITY  
IMPLEMENTATION**

# Droniq drone tracking – working anywhere

# Guess what...

**How many Geo-Zones does Germany currently have where you need at least an approval from a land or property owner?**

**150.000**

**...we need to change that !!**
