Bat, not drone, blamed for light plane collision during landing at Parafield Airport

By Isabel Dayman

Updated 21 Jul 2017, 2:27am

A light plane most likely hit a bat when coming in to land at Adelaide's Parafield Airport and not a drone as first thought, the Australian Transport Safety Bureau (ATSB) has said.

Earlier this month, a pilot reported hitting what he thought was a drone when landing at the airport in Adelaide's northern suburbs.

"After landing, the instructor conducted an inspection of the aircraft and found minor damage to the right wing," the ATSB said in a statement on its website.

AIRSENSE

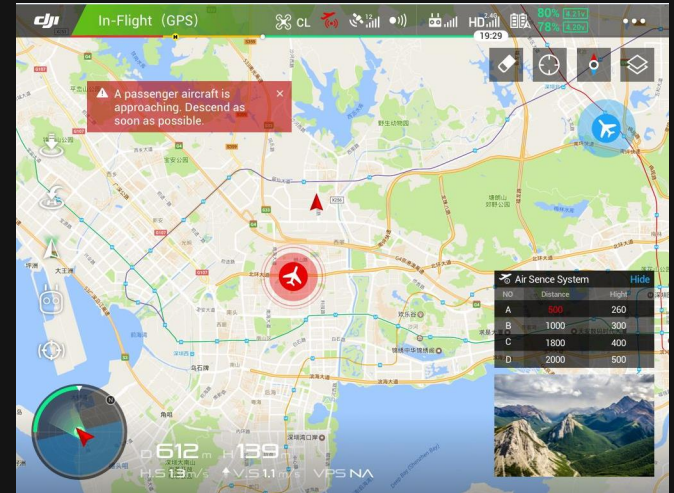

The screenshot displays the DJI AirSense interface. At the top, it shows 'In-Flight (GPS)' and various status icons including signal strength, battery (80% and 78%), and time (19:29). A red warning box in the center of the map reads: 'A passenger aircraft is approaching. Descend as soon as possible.' The map shows a red aircraft icon with a red circle around it, indicating the detected aircraft's position. A compass and altitude/velocity readouts are visible at the bottom left.

DJI WILL INSTALL ADS-B
RECEIVERS
IN EVERY NEW DRONE MODEL
ABOVE 250 GRAMS
STARTING IN 2020

Download at:
dji.com/flysafe

- 1** DJI will install AirSense ADS-B receivers in all new drones above 250 grams
- 2** DJI will develop a new automatic warning for drone pilots flying at extended distances
- 3** DJI will establish an internal Safety Standards Group to meet regulatory and customer expectations
- 4** Aviation industry groups must develop standards for reporting drone incidents
- 5** All drone manufacturers should install geofencing and remote identification
- 6** Governments must require remote identification
- 7** Governments must require a user-friendly knowledge test for new drone pilots
- 8** Governments must clearly designate sensitive restriction areas
- 9** Local authorities must be allowed to respond to drone threats that are clear and serious
- 10** Governments must increase enforcement of laws against unsafe drone operation
