Federation of AIM Associations

ICAO AIS AIM SG8, Montreal, 8Nov2013

OBJECTIVES

- To promote safety, efficiency and regularity in International Air Navigation;
- To assist and advise in the development of AIM, in order to maintain the safe, orderly and expeditious flow of air traffic;
- To uphold a high standard of knowledge and professional efficiency amongst AIM personnel;
- To protect and safeguard the collective professional interests of AIM personnel;
- To make mutual benefit affiliations with other professional organizations;
- To strive for a worldwide Federation of AIM Associations.

COURSE DESCRIPTION

DRAFT

OBJECTIVES

Generically know the Aeronautical infra-structures, facilities, services and Aeronautical organizations that have a direct relationship with the normal performance of the AIS and COM services, namely, their organization, objectives, functions and applicable general regulation. At the end of the course, participants should demonstrate Knowledge that allows them to initiate the proper specializations of the AIS and COM services.
Note: This course shall be complemented with the specializations/qualifications AIS and COM that will allow the trainees, after the on-job-training, to the performing of the AIM functions.

TARGET AUDIENCE

Candidates to AIM Staff.

PRE-REQUISITES

To have successfully completed the recruiting process to enter the AIM professional career.

EDITORIAL

Fernando Lopes
IFAIMA President
ifaima.vp@gmail.com

Dear colleagues,

We are approaching one more Conference. This year brightened by the association of ICAO and Eurocontrol.

Istanbul will be the bridge between Europe and the Middle East and being this the third edition of the event in which IFAIMA took the lead as organizer, we have great expectations about a great participation (already confirmed) and about its success.

We will be celebrating the 60th anniversary of Annex 15 and back to back with the event, CANSO will be performing its CANSO AIM WG meeting and for which, kindly invited IFAIMA to participate.

Resuming, we expect in this four day event, in one single geographic location, the major AIM experts concentration the world has ever watched with their projects and ideas (presentations), perfect conditions for the exchange of experiences between colleagues coming from all the ICAO Regions as well as the observation of the latest innovations made available to you by our sponsors on the dedicated exhibition area right next to the conference room. In this regard, we would like to thank the Industry for its participation which makes all this possible to IFAIMA and to the AIM community.

We recognize the need of all the world's organizations gathered in one sole objective and we are ready to contribute in a positive way for the improvement of AIS and for the transition from AIS to AIM towards SWIM facing all the challenges foreseen in the near future.

As for this newsletter I draw your attention for the two articles, one regarding the Digital NOTAM from Mr. Eduard Porosnicu and the other one regarding AIM Industry form Mr. Ahmed Allam.

One last word to announce the 6th IFAIMA General Assembly in which we'll be performing the ballot for election of two Executive Board offices, Vice-President and Executive Secretary.

I hope I can meet you all in Istanbul next month and count with your collaboration and participation.

Enjoy the reading.
