

## State Action Plans (SAP) on CO<sub>2</sub> Emissions Reduction Activities

As of February 2025, **150 States (99.11% of global RTK)** have voluntarily submitted their State Action Plan.

**New Release!** The 4th Edition of ICAO Doc 9988, **Guidance on the Development of State Action Plans**, is now available!

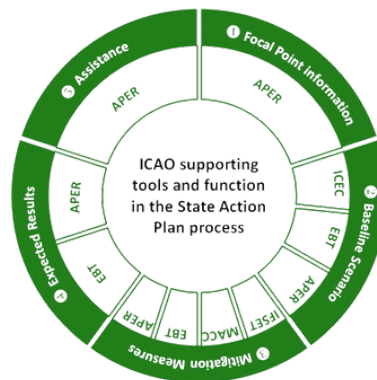

**State Action Plans** will play a pivotal role in **monitoring progress on the implementation of all elements** towards achieving the **LTAG**.

Updated guidance now reflects the **Long-term global aspirational goal (LTAG)** for international aviation and the **ICAO Global Framework for SAF, LCAF and other Aviation Cleaner Energies**. Ready to share the future of sustainable aviation?

Join the ICAO State Action Plan Buddy Programme!

The 5 (five) basic elements and associated tools to develop a SAP.

If your State has already submitted an Action Plan, **offer support and guidance to others** in their development. Reach out to ICAO to **partner in promoting international cooperation**.

Your Action Plan can serve as the foundation for your application for green financing!

**Quantified CO<sub>2</sub> reductions make all the difference!** Use your quantified CO<sub>2</sub> reduction data from your Action Plan as the core evidence of your project's sustainability benefits!

Contact ICAO for more information on how to develop/update your State Action Plan.
